WSTĘP

W 2016 roku wzrasta o cztery liczba hodowli półwlnych. Jest to skutek sytuacji, kiedy rosnąca liczba zwierząt trzymanyh na dużym ogrodzonym terenie uniemożliwia kontrolę rodowodową w stadzie. Dotyczy to hodowli Bornholm (Dania) i Kraansvlak (Holandia) oraz dwóch hodowli w Kazachstanie. Hodowle te od 2016 roku będą rejestrowane odpowiednio, jako ♦BORNHOLM (Dania) i ♦KRAANSVLAK (Holandia) oraz ♦KABANBAJJ i ♦KRASNYJJ KORDON (Kazachstan).

Dalszym etapem rozwoju hodowli półwlnych bywa przekształcenia ich w hodowle wolne. Sytuacja taka miała miejsce w przypadku hodowli ♦ARMENIS (Rumunia), oraz ♦OKHOTKHOZJAJSTVO «KRASNYJJ BOR» (Białoruś). W tym ostatnim przypadku zwierzęta uwolniono na początku listopada 2016 r., co spowodowało dołączenie wypuszczonych zwierząt do pobliskiej hodowli wolnej OKHOTKHOZJAJSTVO «KRASNYJJ BOR», z którą utworzyły administracyjnie jedną, powiększoną populację.

Redakcja wprowadza do Tabeli *Urzędowy rejestr żubrów urodzonych...* nowy symbol „♣” dla oznaczenia żubrów, których czystość krwi została ustalona metodami molekularnymi i zagwarantowana certyfikatem wydanym przez Laboratorium Wydziału Genetyki i Hodowli Zwierząt Szkoły Głównej Gospodarstwa Wiejskiego w Warszawie. Ta nowa metoda może być zastosowana w przypadku zwierząt nie istniejących w rejestrach KRŻ, lecz egzystujących w naturze u hodowców usuniętych wcześniej z ewidencji, nie zarejestrowanych w Księdze, bądź też zarejestrowanych, ale posiadających także zwierzęta o nieznanym pochodzeniu. W niniejszym zeszycie sytuacja taka dotyczy jednej krowy z czeskiej hodowli Tábor oraz kilku zwierząt z francuskiej hodowli Mezieres.

W marcu 2016 roku 5 żubrów (1 samiec i 4 samice) z hodowli wolnej ORLOVSKOE POLES'E NACIONAL'NYJJ PARK – «ОРЛОВСКОЕ ПОЛЕСЬЕ» НАЦИОНАЛЬНЫЙ ПАРК (Rosja) zostało przewiezionych do innej rosyjskiej hodowli wolnej – NACIONAL'NYJJ PARK „UGRA” – НАЦИОНАЛЬНЫЙ ПАРК «УГРА».

W Rosji utworzono nową wolną hodowlę URGANSKIJJ RAJJON SMOLENSKOJJ OBLASTI. Jej początek dał wędrujący byk z sąsiedniej hodowli wolnej «KALUZHSKIJE ZASEKI» ZAPOVEDNIK.

Jałówka 13572 TULA urodzona w półwlniej hodowli ♦MILOVICE (Republika Czeska) otrzymała – na prośbę hodowcy – numer rodowodowy. Cielę to urodziło się w wyniku transportu ciężarnej krowy 11047 PODSTOLINA II z Pszczyny (hodowca: Pszczyna). Było to jedyne cielę urodzone w tej hodowli w 2016 roku. Zwierzę zostało indywidualnie oznakowane (chip) i jest możliwe do identyfikacji.

Na prośbę administracji litewskiej zmieniono nazwę wolnej hodowli PANEVĖŽYS-PAŠILIŲ STUMBRYNAS na PANEVĖŽYS AND KĖDAINIAI DISTRICTS. Decyzja wynika z powiększenia się areалу stada w okolicy Panevėžys.

Z wolnej hodowli NARODNY PARK POLONINY (Słowacja) odłowiono 3.03.2016 roku rannego byka, którego można było zidentyfikować dzięki posiadanej obroży. Jest to M 12245 PULECH, urodzony w polskiej hodowli Muczne, skąd przewieziono go do zagrody na terenie Nadleśnictwa Komańcza, a następnie 27 stycznia 2016 r. został wypuszczony na wolność na terenie BIESZCZADÓW. Obecnie byk 12245 PULECH przebywa w zagrodzie Animoterapeuticko-jazdeckovo centra w Snine (Słowacja). Zwierzę to wprowadzono ponownie do rejestrów rodowodowych z oznaczeniem „♣” (por.: Tabela *Zmiany stanu żubrów w roku 2016*).

Redakcja zdecydowała o usunięciu w zeszycie za 2016 r. niżej wymienionych zwierząt i hodowli z powodu braku informacji od hodowcy, mimo wielokrotnych ponagleń. Dotyczy to nieznanego hodowcy z Bocholt w Belgii, który prawdopodobnie zajmuje się jedynie sprzedażą zwierząt. Ze słowackiej hodowli Čata usunięto byka 11712 KVIDO, którego los jest nieznanym. Skreślono także, wraz ze zwierzętami niemiecką hodowlę Lich, na temat, której nasz niemiecki współpracownik donosi, że nie posiada obecnie zwierząt, a los wcześniej posiadanych jest nieznanym.

Jan Raczyński

INTRODUCTION

2016 brought an increase by 4 in the number of semi-wild Breeding Centres. The significance of this lies in the fact that, where a growing number of animals are maintained in a large enclosure, it ceases to be possible to monitor pedigrees among European bison forming such herds. The centres involved in these cases are Bornholm (Denmark) and Kraansvlak (The Netherlands), as well as two locations in Kazakhstan. From 2016 on, these centres are being registered as ♦BORNHOLM (Denmark) and ♦KRAANSVLAK (The Netherlands), as well as ♦KABANBAJJ and ♦KRASNYYJ KORDON (Kazakhstan).

A not-unusual further stage in the development of Centres in the above situation is for them to be relisted as Centres with free-ranging or wild-state groups of animals. This time round such a situation has arisen in the cases of the Centres listed as ♦ARMENIS (Romania) and ♦OKHOTKHOZ-JAJJSTVO «KRASNYYJ BOR» (Belarus). In the latter case, the early-November 2016 release of bison into the wild had the effect of adding to an already-existing wild-state population nearby, ascribed to the OKHOTKHOZJAJJSTVO «KRASNYYJ BOR» Breeding Centre. The result is that a single enlarged population can now be regarded as established.

The Editorial Office has decided to assign to the Table entitled *Official register of pure-bred European bison born...* a new "♣" symbol which can be taken to denote a bison whose genetic purity has now been established using molecular methods, with relevant certification provided by the Laboratory at the Department of Genetics and Animal Breeding (Faculty of Animal Science) of SGGW (Warsaw University of Life Sciences). This new method may be applied in the case of animals not currently covered at all by *EBPB* registration, or existing in the natural state at Centres hitherto struck from listings, either not registered in the *Pedigree Book* at all, or else registered but also having animals of unknown origin in their possession. In this volume, the situation – and the symbol – relate to just a single cow from the Tabor Breeding Centre in the Czech Republic, as well as several animals from the French-based Mezieres Breeding Centre.

In March 2016, 5 bison (1 male and 4 females) from the ORLOVSKOE POLES'E NACIONAL'NYJJ PARK Breeding Centre (Russia) – where animals are present in the wild state – were transferred to another Centre enjoying the same status known as NACIONAL'NYJJ PARK "UGRA".

Yet another Breeding Centre with free-ranging bison has in fact now been set up in the Russian Federation, i.e. URGANSKIJJ RAJJON SMOLENSKOJJ OBLASTI. A start to that population was made when a bull arrived in the area in question from a neighbouring Centre also maintaining European bison in the wild state entitled «KALUZHSKIJE ZASEKI» ZAPOVEDNIK.

At the request of the Breeder, the heifer 13572 TULA, born into the semi-wild-state population at the Czech Breeding Centre of ♦MILOVICE, has received a pedigree number. This animal originated as a calf born following transport of pregnant cow 11047 PODSTOLINA II from the Pszczyna Breeding Centre in Poland (breeder: Pszczyna). This was the only calf born to that Centre in 2016, and the animal has been supplied with a chip making identification possible.

At the request of the Lithuanian administration, the Breeding Centre hitherto known as PANEVĖŽYS-PAŠILIŲ STUMBRYNAS is now named PANEVĖŽYS AND KĖDAINIAI DISTRICTS. This decision regarding a name-change reflects the increased area over which the herd in the Panevėžys area is now free to range.

On March 3rd 2016, a wounded bull was captured and removed from the Slovakian Breeding Centre with a population existing in the wild state known as NARODNY PARK POLONINY. Thanks to the presence of a ring, it proved possible to identify this animal as M 12245 PULECH,

born at the Muczne Breeding Centre in Poland, from which it was transferred to an enclosure within Komańcza Forest District, prior to its January 27th 2016 release into the wild in the BIESZCZADY Breeding Centre area. 12245 PULECH is currently in an enclosure of the *Animoterapeuticko-jazdeckovy Centr* located at Snina (Slovakia), and the animal has been reintroduced among the *Pedigree Book* listings, with a “⇐” symbol (see table on *Transfers of European Bison in 2016*).

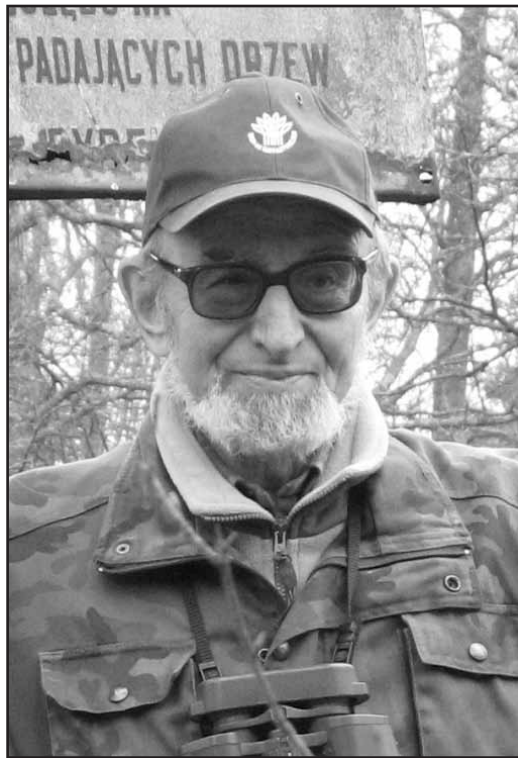

In turn, more removals of animals and Centres from the listings in the 2016 edition have been prompted by a lack of information from Breeders, despite oft-repeated requests. This situation applies to the unknown Breeder at Bocholt in Belgium, who most likely confines actual activity to the sale of bison. Bull 11712 KVIDO has been struck from the listing for the Čata Breeding Centre in Slovakia, given that its fate remains unknown. Also removed, along with its animals, is the Lich Breeding Centre in Germany, which our German correspondent suggests is no longer in possession of any bison, albeit with the circumstances of the animals it did have remaining unknown.

Jan Raczyński

Pamięci dr. inż. Czesława Okołowa (1935–2016)

Czesław Okołów urodził się 21.XII.1935 r. w leśniczówce położonej we wschodniej części Puszczy Białowieskiej, w rodzinie leśnika. Jego dojrzałe życie miało się nieodłącznie wiązać z Puszczą Białowieską, mimo przeciwności losu i dramatycznych wydarzeń historycznych.

Wydarzenia II Wojny Światowej bardzo wczesnie zaciążyły na losie jego rodziny. W 1940 r. władze sowieckie po opanowaniu wschodniej części Polski, deportowały członków polskiej administracji w głąb terytorium ZSRR. W trakcie zsyłki do Kazachstanu stracił ojca i brata. Do Polski

wrócił z matką w 1946 r. jako repatriant i kontynuując tradycję rodzinną w 1958 r. ukończył studia na Wydziale Leśnym w Szkole Głównej Gospodarstwa Wiejskiego (Warsaw University of Life Sciences – SGGW) ze specjalizacją w zakresie entomologii i ochrony przyrody. Na początku 1960 r. otrzymał pracę w Białowskim Parku Narodowym, gdzie objął stanowisko kustosa w Muzeum Przyrodniczo-Leśnym BPN, później awansował na etat naukowy. W 1967 r. obronił pracę doktorską na macierzystej uczelni. Jako pracownik BPN ukończył Podyplomowe Studium Ochrony Przyrody w Krakowie a następnie zaliczył Seminarium Ochrony Przyrody i Parków Narodowych w Ann Arbor (USA). W 1989 r. został powołany na stanowisko zastępcy dyrektora, zaś w 1992 r. objął stanowisko dyrektora Białowskiego Parku Narodowego, które piastował do odejścia na emeryturę w 2003 r. Będąc w stanie spoczynku nie zaprzestał pracy w BPN – nadal zatrudniony był na niepełnym etacie i zajmował się m.in. redagowaniem kwartalnika Parki Narodowe i Rezerwaty Przyrody.

Czesław Okołów był cenionym specjalistą w zakresie ochrony polskiej przyrody oraz zwolennikiem ochrony całej Puszczy Białowieskiej. W okresie, gdy kierował Parkiem, obszar BPN został powiększony z 5317 ha do 10501,95 ha, a wokół Parku założono strefę ochronną. Swoją aktywność realizował zarówno w pracy naukowej, jak i w dbałości o księgozbiór biblioteki Parku oraz w przedsięwzięciach społecznych w zakresie udostępniania obszaru BPN i rozwoju turystyki przyrodniczej w Puszczy Białowieskiej. Był autorem licznych publikacji popularyzujących ochronę przyrody, w tym przewodników po Białowskim Parku Narodowym oraz opracowań regionalnych dotyczących Puszczy Białowieskiej.

Okres Jego kadencji jako dyrektora BPN był dla Redakcji KRŻ czasem stabilizacji i efektywnej pracy w warunkach życzliwego zainteresowania i pomocy w codziennych wysiłkach, mających na celu aktualizację danych o hodowli żubrów na świecie. Ogromną pomoc okazał Dyrektor Okołów Redakcji KRŻ w uzyskaniu niezbędnych informacji o żubrach z terenów byłego ZSRR oraz w przeprowadzeniu właściwej transliteracji nazw hodowli pisanych cyrylicą.

W ostatnich latach życia podjął się polskiego przekładu historycznego opracowania o Puszczy Białowieskiej (Karcov G. 1903: *Bielowieżskaja Puszcza 1382–1902 – historia, położenie geograficzne i klimat, fauna, polowania carskie*), przybliżając polskiemu czytelnikowi dostęp do oryginalnych materiałów, dotyczących ochrony Puszczy Białowieskiej i populacji białowieskiego żubra na przełomie XIX i XX w.

Działalność naukowa i popularyzacyjna Czesława Okołowa oraz cały okres Jego zarządzania Parkiem, charakteryzujący się licznymi kontaktami z międzynarodowymi strukturami parków narodowych na świecie, przyniosły wiele korzyści polskiej ochronie przyrody, w tym ochronie żubrów w Puszczy Białowieskiej.

Cześć Jego pamięci
Jan Raczyński

In memory of Dr. Czesław Okołów (1935–2016)

Czesław Okołów was born on December 21st 1935, in the Forester's house located in the south-eastern part of Białowieża Forest, given his father's status as a Forester. And, notwithstanding twists of fate and dramatic historical events seeming to mitigate against it, Okołów's life was (and is) linked irrevocably with the Białowieża Forest.

But, like so many others, this was a Polish family deeply affected by the Second World War. In 1940, the authorities of a USSR that had invaded and overrun eastern Poland determined to deport all representatives of the Polish administration to places deep inside Soviet territory. So it was

that, *en route* to far-off Kazakhstan, a teenage Czesław was exposed to the deaths of both father and brother. His mother survived the War, however, and it was with her that he was repatriated after 6 years outside Poland.

A decision to continue with the family tradition saw him complete studies in 1958, at the Faculty of Forestry of SGGW (Warsaw University of Life Sciences). His specialisations there were entomology and nature conservation. Then, starting in 1960, Okołów took up a post with Białowieża National Park, as custodian of the Park's Museum of Nature and Forestry. Seven years later, he defended his Doctoral Thesis at his *alma mater*, and – as a BNP employee – did both postgraduate studies in Nature Conservation in Kraków and a Conservation and National Parks Seminar at Ann Arbor (USA). In 1989, he was made Deputy Director of the National Park, and as soon as in 1992 he was made its Director. Czesław Okołów would continue in this post right up to the time of his retirement in 2003, but – needless to say – this official status did not coincide with any real cessation of work in the name and interests

of the Park. He continued to be employed there part-time, and his work in this period including editing of the Polish quarterly relating to protected areas entitled National Parks and Nature Reserves.

Dr. Okołów was a well-thought-of specialist in the field of nature conservation in Poland, and an advocate of protecting the entire Białowieża Forest area. Under his leadership, the Park proper did indeed increase in size from 5317 to 10501.95 ha, while a Buffer Zone was also delimited around it. His other activity ranged from scientific work to care to ensure that the Park Library's book collections were improved, as well as efforts in the name of society in general to make BNP accessible to tourists, and to ensure that the tourism in the wider Forest also developed. He authored a host of publications popularising nature and its conservation, including – of course – guides to Białowieża National Park and studies of a regional nature relating to the whole area.

From the point of view of the Editorial Office of European Bison Pedigree Book, Czesław's term as Park Director represented a period of stability and effective work. This reflected his warm interest in its activity and keenness to help out on a daily basis with efforts to update data on Breeding Centres for the European bison worldwide. The Director was of particular assistance in obtaining information on bison in the ex-Soviet countries; and in providing proper transliterations of names of Centres written in Cyrillic script.

In the most recent period, Czesław Okołów had devoted himself to a Polish translation of a 1903 work on the Forest by G. Karcov (Russian officer, worker of Ministry of the Interior) entitled *Belovezskaja Pushha 1382–1902 – history, geographical location and climate, fauna, tsar hunting*. This effort did much to grant Polish readers access to original material on the protection of the Białowieża Forest and its Lowland European bison in the late 19th and early 20th centuries.

Overall, both the scientific and popularising activity of Czesław Okołów, and his management work on Białowieża NP (also a Biosphere Reserve and World Heritage Sites) ensured much domestic and especially international benefit and recognition for Polish conservation, and most especially of course for the protection of the European bison in its unique forest home.

Honouring his memory
Jan Raczyński

Profesor dr hab. Zdzisław Pucek
(1930–2007)
Członek rzeczywisty Polskiej Akademii Nauk

Wspomnienie w dziesiątą rocznicę śmierci

Zdzisław Pucek urodził się w Radzynie Podlaskim, w małżeństwie nauczycieli. W dzieciństwie stracił ojca, który zginął w czasie okupacji hitlerowskiej w akcji niszczenia polskiej inteligencji przez nazistów. Ukończył Liceum im. J.I. Kraszewskiego w Białej Podlaskiej, następnie podjął

studia biologiczne na Uniwersytecie im. Marii Curie-Skłodowskiej (UMCS) w Lublinie, które zakończył na Uniwersytecie w Warszawie, pracą magisterską wykonaną pod kierunkiem prof. Augusta Dehnela.

Pracę zawodową, jako pracownik naukowy, rozpoczął bezpośrednio po studiach w Zakładzie Badania Ssaków w Białowieży – placówce tworzonej i kierowanej przez prof. Augusta Dehnela, która rozwinęła się z czasem w Instytut Polskiej Akademii Nauk (obecnie Instytut Biologii Ssaków PAN). Na podstawie badań nad ryjówką aksamitną w 1960 r. uzyskał na UMCS stopień doktora, a następnie habilitował się na Uniwersytecie Jagiellońskim w Krakowie. Dalsze stopnie kariery naukowej Z. Pucka wyznaczyło nadanie Mu stopnia profesora w 1971 r. oraz przyznanie tytułu członka korespondenta (1986) a następnie członka rzeczywistego Polskiej Akademii Nauk. Po śmierci prof. A. Dehnela, (1962 r.) włączył się w kontynuację jego dzieła, obejmując wkrótce kierownictwo Zakładu, które sprawował do 1999 r.

Problematyka badawcza, którą się zajmował była bardzo szeroka i obejmowała wiele grup ssaków – od ryjówek, które były jego ulubionym obiektem badań morfologicznych i systematycznych, po żubra, kiedy rozwijał i koordynował prace badawcze i organizacyjne poświęcone ochronie tego zagrożonego gatunku w Polsce i na świecie. Był skutecznym organizatorem wielu długookresowych programów badawczych nad ssakami Puszczy Białowieskiej i Polski oraz redaktorem i autorem wielu opracowań syntetycznych – m.in. Atlasu rozmieszczenia ssaków w Polsce, Klucza do oznaczania ssaków Polski; uczestniczył w monograficznych opracowaniach ssaków Europy, jak np. w Handbuch der Säugetiere Europas, gdzie opracował smużki (*Sicista*) i żubra. Kierując Zakładem przywiązywał wielką wagę do rozwoju fachowego księgozbioru oraz przejął po prof. Dehnelu i rozwinął polskie czasopismo poświęcone badaniom nad ssakami, jedno z nielicznych na świecie o sformatowanym profilu naukowym – *Acta theriologica*.

W dziedzinie problematyki poświęconej żubrowi, prof. Pucek miał wielki wkład w działania organizacyjne i kształtowanie zakresu badań nad tym gatunkiem, popierając zarówno gromadzenie kolekcji czaszek osobników pochodzących z hodowli wolnych i zagrodowych, jak i uczestnicząc

w programach ochrony i koordynacji działań nad ochroną żubra w Puszczy Białowieskiej, po obu stronach granicy. Jego udział w Konferencjach polsko-radzieckich, organizowanych w Kamieniu-kach (Białoruś) i w Białowieży, owocował rozwojem idei i praktyki ochrony tego gatunku, które były następnie rozwijane podczas wizyt w Moskwie, dzięki osobistym kontaktom z badaczami rosyjskimi. Jako badacz zaangażowany w ochronę żubra był właściwą osobą, do której zwróciła się w 1967 roku dr Erna Mohr w trosce o usprawnienie wydawania w Polsce rejestracji rodowodowej żubrów. Efektem tego porozumienia było podjęcie się przez niżej podpisanego obowiązków sekretarza Redakcji KRŻ, zreformowanie kontaktów Redakcji Księgi z hodowcami żubrów na świecie i opracowanie zeszytu 1965–1969, który zapoczątkował nową edycję Księgi Rodowodowej Żubrów – European Bison Pedigree Book. Podczas tej pracy nowy sekretarz mógł zawsze liczyć na życzliwą radę i pomoc ze strony swego mentora i kierownika macierzystej placówki naukowej, dla którego rozwiązywanie trudnych problemów organizacyjnych i tworzenie nowych koncepcji były priorytetem w codziennym działaniu.

Wielkie wsparcie okazał prof. Pucek Redakcji Księgi również po jej przejęciu przez Białowiecki Park Narodowy w 1991 roku. Pomógł wówczas w odnowieniu kontaktów z wieloma hodowcami żubrów oraz w nawiązaniu nowych. Jego autorytet nierzadko mobilizował hodowców do przesłania zaległych informacji o stanie zwierząt oraz zmianach, jakie zaszły w stadzie. Dzięki tej pomocy udało się uaktualnić dane o żubrach, wydać kolejny zeszyc KRŻ z zaległymi informacjami oraz rozpocząć coroczne edycje Księgi, dzięki czemu hodowcy otrzymują najbardziej aktualne dane o żubrach.

Zainteresowanie i działania Profesora w dziedzinie ochrony żubra zaowocowały powstaniem w 1984 r. w strukturze Międzynarodowej Unii Ochrony Przyrody (Survival Service Comission) oddzielnej jednostki – Bison Specialist Group z Z. Puckiem, jako jej przewodniczącym (1985–2000). Z Jego inicjatywy i pod Jego kierownictwem powstała ważna dla ochrony zagrożonego gatunku Światowa Strategia Ochrony Żubra (Status, Survey and Conservation Action Plan IUCN, 2004) do powstania której zmobilizował najlepszych specjalistów zajmujących się tą problematyką, którzy opracowali zasady ochrony *Bison bonasus* na podstawie aktualnego stanu wiedzy i światowego dorobku naukowego w tej dziedzinie.

W Polsce uchodził za cenionego specjalistę w ochronie i zarządzaniu populacjami wolno żyjących żubrów; bez jego opinii nie zapadały żadne ważne decyzje również na temat losów wolnego stada żubrów nizinnych w Puszczy Białowieskiej. Nauka i praktyka współczesnych działań nie może już liczyć na Jego wnikliwe opinie i stanowcze propozycje w kluczowych problemach ochrony gatunkowej, jakie stają przed środowiskiem naukowym w dziedzinie zarządzania najcenniejszymi zasobami polskiej przyrody. Odczuwamy to także dziś – gdy minęło dziesięć lat od Jego odejścia.

Cześć Jego pamięci
Jan Raczyński

Prof. Zdzisław Pucek
(1930–2007)
Full Member, Polish Academy of Sciences

Recollections marking the tenth anniversary of his death

Zdzisław Pucek was born in 1930 to teachers living in Radzyń Podlaski. Tragically, he would lose his father while still a child, in the context of the occupying Nazis' efforts to eliminate Poland's intelligentsia. Having completed studies at the J.I. Kraszewski High School in Biała Podlaska, he went on to study biology at the Marii Curie-Skłodowskiej University (UMCS) in Lublin.

This work was completed at the University in Warsaw, with Master's studies under the tutelage of Prof. August Dehnel.

Zdzisław Pucek began his scientific career straight after studies, at the Białowieża-based Mammals Research Lab created and directed by Prof. August Dehnel. This gradually evolved into an Institute of the Polish Academy of Sciences (and today's Mammal Research Institute PAS). The title of "Doctor", awarded by the UMCS in 1960, reflected research work on the common shrew *Sorex araneus*. Habilitation at the Jagiellonian University in Kraków followed, with a professorial title in 1971, and the status of Corresponding Member of the Polish Academy of Sciences in 1986. Full Membership of the PAS was achieved more recently.

Following the death of Prof. Dehnel in 1962, it was seen as a key mission for the work of the pioneer to be continued; and first and foremost the leadership of the research institution he founded. Prof. Pucek duly took up that post, which he continued to hold through to 1999.

Where research was concerned, subjects ranged from the aforementioned shrews *Soricidae* (a favourite group, which were studied from the morphological and systematic points of view) through to European bison *Bison bonasus* (the species endangered on the Polish and world scales whose study and protection was further developed under Prof. Pucek's leadership). Indeed, this was an effective organiser of many long-term programmes of research into the mammals of Białowieża Forest and Poland more widely, as well as the editor and author of a host of synthetic studies, not least *Atlas of Polish mammals maps* (PWN 1983), as well as *Keys to Vertebrates of Poland. Mammals* (PWN 1981). In turn, in the theriological *Handbuch der Säugetiere Europas*, it was Zdzisław Pucek's task to work on the birch mouse (*Sicista*) on the one hand, and the European bison on the other. In heading up his institution, the Professor attached great weight to building a representative book collection. The Dehnel baton was also passed on to him when it came to continuing with and developing the Polish journal *Acta theriologica* – one of relatively few in the world to have a formatted scientific profile.

Where the topic of the European bison was concerned, Prof. Pucek indeed made a major contribution to organisational and educational work relating to the species, supporting the collecting of skulls of both free-ranging and captive specimens, and participating in joint Polish-Soviet conservation programmes. His attendance at Polish-Soviet conferences organised first in Kamieniuki (Belarus) and then on the Polish side of the border at Białowieża, bore fruit in further developments in both theory and practice, later taken up in the course of Moscow visits that ensured good contacts with Russian researchers.

Given his high level of involvement in bison conservation, Zdzisław Pucek was the right person for Dr. Erna Mohr to turn to in 1967, as she sought to streamline the pedigree registration of European bison already being engaged in Poland. The effect of the agreement reached then was taken on by the undersigned's assuming of responsibilities as Assistant Editor of the *European Bison Pedigree Book*, reform of the process by which the *Book's* Editorial Office maintains contacts with breeders of European bison around the world, and the elaboration of the new-style 1965–1969 issue. As this work was being conducted, the new Assistant Editor could always count on the helpful advice and assistance of Prof. Pucek who was both mentor and head of the parent scientific institution, and someone for whom a daily priority was the solving of tricky organisational problems and the development of entirely new concepts.

Prof. Pucek continued to offer unstinting support to the *Pedigree Book's* Editorial Office once the work had been taken on by Białowieża National Park in 1991. At that point he assisted with the renewal of contacts with many bison-breeders, as well as with the forging of new links. His authority could more than once be relied on to mobilise breeders into sending overdue information on the status of animals in their care, and on the changes taking place in their herds. With this help it proved possible to update data on bison, with a further edition of the *Book* with the missing information being issued, and with annually updated versions following on from that. In this way, breeders have been assured of the most up-to-date information on European bison.

The conservation interests and activities of Zdzisław Pucek were again recognised in 1984, when the IUCN Special Survival Commission set up a Bison Specialist Group that he headed through the whole 1985–2000 period. It was also at his initiative – and under his leadership – that a Status, Survey and Conservation Action Plan for the species appeared (IUCN, 2004). This mobilised all the best specialists on the subject, who went on to devise principles for the protection of *Bison bonasus* that were based on the latest knowledge and relevant global scientific output.

In Poland, Zdzisław Pucek became renowned as a much-valued specialist on the protection and management of free-ranging populations of *European bison* – to the extent that no decision regarding the Lowland Line population living in Białowieża Forest was ever taken without his opinion first being sought. Sadly, the theory and practice of species conservation in Poland may no longer rely on those ever-incisive opinions, followed by concrete proposals. And that is a deficit we continue to feel tangibly today, notwithstanding the ten years that have already elapsed since his passing.

Honouring his memory
Jan Raczyński

^{1/} Hodowle posiadające wyłącznie żubry linii nizinnej wyróżniono pogrubioną czcionką.

^{1/} Breeding centres possessed of European bison of Białowieża – line only are designated by bold print.

^{2/} Hodowle wolne wyróżniono wersalikami.

^{2/} Free living herds are designated by capital letters.

♦ Hodowla półwolna.

♦ Indicates semi-free breeding centre.
